

## Städtevergleich: Wohnbevölkerung nach Alter 2012-2022

I\_62

**Quelle:** Bundesamt für Statistik: STATPOP

**Tabellen:** Separates Tabellenblatt für jedes Statistikjahr

**Definition:** Zur Wohnbevölkerung zählen:

- alle schweizerischen Staatsangehörigen mit einem Haupt- oder Nebenwohnsitz;
- ausländische Staatsangehörige mit einer Aufenthalts-, Niederlassungs-, Kurzaufenthaltsbewilligung, EDA-Ausweis [internationale Funktionäre, Diplomaten und deren Familienangehörige] oder Personen im Asylprozess (Ausweis F oder N)
- Personen mit einem Nebenwohnsitz, die über keinen Hauptwohnsitz in der Schweiz verfügen.

**Bedeutung:** Die Wohnbevölkerung umfasst den Personenkreis, der sich in einer Gebietseinheit permanent oder temporär Wohnsitz genommen hat und im Zusammenhang mit ihrem Wohnaufenthalt dessen Infrastruktur beansprucht. Da eine Person einen Nebenwohnsitz in mehr als einer Gebietseinheit haben kann, resultieren aus einer Summierung der Wohnbevölkerung nach Gebietseinheiten Doppelzählungen. Die Wohnbevölkerung einer übergeordneten Gebietseinheit (z.B. Kanton) ist deshalb nicht die Summe der Wohnbevölkerung der untergeordneten Gebietseinheiten (z.B. Gemeinden).

**Hinweise:** Informationen zu den Vergleichsstädten sind im Internetauftritt des Statistikportals zu finden:  
[Schweizer Vergleichsstädte](#)

Geplante nächste Aktualisierung mit den Zahlen 2023: Anfang September 2024
